I can create a set of instructions and a comic strip to plan my writing.

1. Firstly, I wash the body in Nile water and wine.

2. Secondly, I make an incision in the left side of the body and carefully removed all of the internal organs except for the heart. once I removed them I put them into the canopic jars.

3. Next I picked up my superhook and vigorously jiggled it around the skull to pull the brain out of the nose.

4. After that, I gilded a tub full of natron and placed it in so it was covered from head to toe with the natron salt. now I wait for 40 days.

5. After 40 days I removed the natron and stuffed the inside with linen, sandalwood and spices so it doesn't lose its shape.

6. perultaneously, I rap the body in thin bandages made of linen don't forget to put some amulets and utter some spells.

7. Then, I put the body in a coffin then put the coffin in another coffin and then another and so on.
